

SOC 4650/5650: Lecture 09 Functions

Christopher Prener, Ph.D.

Spring 2018

Packages

- base
- tidyverse
 - dplyr

Assessing Variable Types

Variable Classes

```
base::class(obj)
```

Is Character?

```
base::is.character(obj)
```

Is Numeric?

```
base::is.numeric(obj)
```

Left Join

Identically Named ID Variable

```
dplyr::left_join(x = xtable, y = ytable, by = "id")
```

Differently Named ID Variable

```
dplyr::left_join(x = xtable, y = ytable,  
  by = c("xid" = "yid"))
```

Summary of Variables

```
dplyr::glimpse(data)
```
